- **Power travels along cables to illuminate frames**
- **Ideal for stylish wall and window displays**
- **For use with double-sided LED frames**
- **Supplied with a two year warranty**

Ensure advertising messaging stands out with our contemporary cable fixing solution.

This sleek suspension system enables graphics to be displayed in a sequence of illuminated poster frames that creates an impressive and memorable display.

The cable system creates a space saving solution with the display of double-sided LED frames, where graphics can be placed on either side of the internal light source. Illuminated poster frames can then be hung together, creating a visually engaging and striking display.

Clever in design, the cable display system is extremely versatile and can be adapted to suit a variety of areas including wall and window displays. By slotting the different sized inter-connectors into the LED frames, the spacing between each frame can be adjusted to create a perfect fit for most locations.

Specially designed tilting fixtures can be added to enable frames to be positioned at a preferred angle. With the ability to tilt the frames from 10 to 45 degrees, displayed graphics can be viewed more easily, resulting in a more impactful display.

Compatible LED display frames:

I Max

VM Two
