

# Fabricated Signage

Specialist sign fabrication for basic to highly complex installations

Product Brochure

## Fabricated signage created to customer design

Fabricated signs manufactured by Applelec include projecting signs, post and panel signs, hanging signs, light boxes and full fascia signage.

Using a range of materials, Applelec's fabricated signage is created to customer design and ranges from simple light boxes to the more complex fabrication processes of shaped illuminated projecting signs. Applelec's sales team provide construction design advice for customers selecting our fabrication service and advise on the most appropriate mounting and fixing techniques for each fabricated sign system.

Flat cut letters, built-up letters, vinyl graphics and illumination are added to fabricated signage to provide detail. As part of Applelec's fabricated signage package, each sign is delivered fully wired and bench tested with all letters mounted and LEDs installed.

Illumination can be added to fabricated signs using LED modules, Applelec's LED Light Sheet or fluorescent systems. Fabricated signage without internal illumination can be lit with Applelec's slim LED Trough Lights which are available in linear lengths up to a maximum length of 2900mm. The trough light can be painted to any RAL or British Standard (BS) reference to match the fabricated sign.

### Key features:

- Projecting signs, hanging signs, post and panel signs, light boxes and full fascia signs
- Signs fabricated to specification
- Lighting components installed and wired up
- Bench tested and ready to install
- Complex fabricated designs or simple solutions
