

# Full Fascia Signs

Fascia signs make life easy and come fully complete and ready to install

Product Brochure

# Get the full package with full fascia signs

Our full fascia signs are delivered fully wired up and bench tested with all letters mounted and LEDs installed.

Created to client design, flat cut letters, built-up letters and LED illumination can all be added to the design of the fascia sign. As part of our full fascia sign package, there is no additional cost for the letter mounting, LED installation, wiring and testing.

We create fascia signs in a variety of styles, from simple and cost efficient panels to bigger, fabricated fascia options. Stainless steel, aluminium and Dibond aluminium composite panels are all available and these can be painted or vinyl wrapped to achieve specific designs.

## Key features

- Full fascia sign package
- All letters mounted
- LEDs installed
- Fully wired up
- Bench tested

Illumination comes from a range of LED modules that are sourced by us specifically for fascia signs according to the size and depth of each panel. An alternative illumination option is the addition of our slim LED Trough Light which can be fixed above the installed sign. With a 28mm diameter, the trough light can be painted to match the colour of the sign.
